Sun Chemical's ink jet pedigree

Sun Chemical's vast knowledge and technical expertise in the inkjet market has come from being at the forefront for many years working closely with the world's largest inkjet printing machinery manufacturers to develop inks for use in their equipment. This expertise has enabled Sun Chemical to launch a range of ink jet inks for a wide range of printers. Sun Chemical has used its vast knowledge and technical expertise in the ink jet market to introduce the Streamline range of ink jet inks for the digital market. The range consists of high quality solvent, oil and water based inks for a variety of wide format and super wide format printers. The inks have been formulated to have similar colour and physical properties to the original inks so that in most cases the existing colour profiles and printer settings can be used. The highest quality pigments are used throughout the range to ensure that maximum brightness and colour strength combine with an expected outdoor life of up to 3 years in a northern European climate. These high quality colours also benefit from reliable adhesion and excellent jetting properties which ensure long print head life. This package is supported by unrivalled technical and engineering support which enables the customer to benefit from reliable, quick and secure ink conversions.

Colour gamut chart showing the extended colour gamut which is achievable using Streamline® inks compared to an OEM ink.

As the world's foremost producer of inks, pigments and colour technology, Sun Chemical is leading our industry in developing and producing products which minimise our impact – and our customers impact – on the environment and striving to maximise the use of renewable resources. We consider it our responsibility to be involved in the communities in which we live and work and to offer direction in meeting today's needs without compromising the ability of future generations to meet theirs.

Our products are intended for sale to professional users. The information herein is general information designed to assist customers whether our products are suitable for their application. All recommendations are made without guarantee, since the application and conditions of use are beyond our control. We recommend that customers satisfy themselves that each product meets their requirements in all respects before commencing a print run. There is no implied warranty of merchantability or fitness for purpose of the product or products described herein. In no event shall Sun Chemical be liable for damages of any nature arising out of the use or reliance upon this information. Modifications of the product for reasons of improvements might be made without further notice.

STREAMLINE VR61

Streamline VR61 has been specifically formulated for use with the HP Designjet Z6100 printer. The colour and physical properties of the original inks have been matched so that existing colour profiles and printer settings can be used in most situations. This ensures easy, trouble free conversion with the minimum of machine downtime.

- 8 Colour Ink Set
- Standard 775ml cartridges
- Re-engineered OEM cartridges
- Meets OEM Standards for:
 - Colour
 - Density
 - Adhesion
 - Print Head Life & Stability
 - Image Performance & Overall Output Quality

STREAMLINE WATER BASED INKS

The Streamline waterbased range has been specifically formulated for use with the HP5000/5500 printers. The colour and physical properties of the original inks have been matched so that existing colour profiles and printer settings can be used in most situations. This ensures easy, trouble free conversion with the minimum of machine downtime.

- Water based inks both standard Dye based and UV pigment based
- Standard 680ml cartridges
- Re-engineered OEM cartridges
- Good adhesion
- Good jetting properties
- Excellent print head stability
